Phase 2 API Documentation

Scope

Phase 2 implements the product catalogue and public demo-enquiry workflows. All paths are relative to the API prefix **`/api/v1`**.

Common response format

Success:

```
{"success": true, "message": "Human-readable message", "data": {}, "meta": {}}
```

Error:

```
{"success": false, "message": "Human-readable message", "error": {"code": "ERROR_CODE", "details": []}, "meta": {}}
```

Protected routes use **`Authorization: Bearer`** . A **`401`** response means authentication is missing or invalid; a **`403`** response means the authenticated user lacks an allowed role.

Products

GET /api/v1/products

• Purpose: list published products.

• Authentication: not required.

• Role: none.

• Headers: none required.

• Query: **`page`** integer minimum 1 (default 1), **`page_size`** integer 1-100 (default 20).

• Success: **`200`**

```
{
  "success": true,
  "message": "Products retrieved",
  "data": [{
    "id": "7c5dd1d1-2dc8-4bd6-a6c2-6c9eb1c5b6d2",
    "name": "AzentioCore",
    "slug": "azentio-core",
    "description": "Core platform",
    "category": "platform",
    "is_published": true,
    "created_at": "2026-10-30T12:00:00Z",
    "updated_at": "2026-10-30T12:00:00Z"
  }],
  "meta": {"page": 1, "page_size": 20, "total": 1, "total_pages": 1}
}
```

• Error responses: **`422`** for invalid query values, using **`VALIDATION_ERROR`**.

GET /api/v1/products/{product_id}

• Purpose: retrieve one published product.

• Authentication: not required.

• Role: none.

• Success: **`200`**, using the **`ProductOut`** fields shown above.

• Error: **`404 {"code":"PRODUCT_NOT_FOUND"}`** for an unknown or unpublished product.

• Error: **`422 {"code":"VALIDATION_ERROR"}`** for an invalid UUID or other validation failure.

POST /api/v1/products

• Purpose: create a product.

• Authentication: required.

• Role: **`admin`** or **`employee`**.

• Headers: **`Authorization: Bearer `** , **`Content-Type: application/json`**.

• Body:

```
{"name":"New Product","slug":"new-product","description":"Description","category":"platform","is_published":true}
```

`name` is 1-255 characters. **`slug`** is optional; if omitted it is generated from **`name`**. An explicit slug must match lowercase letters, digits, and hyphens. **`description`** and **`category`** are optional. **`is_published`** defaults to **`false`**.

• Success: **`201`** with the created product fields.

• Errors: **`401 AUTHENTICATION_REQUIRED`**, **`403 FORBIDDEN`**, **`409 SLUG_CONFLICT`**, or **`422 VALIDATION_ERROR`**.

PATCH /api/v1/products/{product_id}

• Purpose: update product fields.

• Authentication: required.

• Role: **`admin`** or **`employee`**.

• Headers: bearer token and JSON content type.

• Body: any combination of:

```
{"name":"Updated Name","description":"Updated description","category":"platform","is_published":true}
```

• Success: **`200`** with the updated product.

• Errors: **`401`**, **`403`**, **`404 PRODUCT_NOT_FOUND`**, or **`422 VALIDATION_ERROR`**.

DELETE /api/v1/products/{product_id}

• Purpose: deactivate a product by setting **`is_published=false`**.

• Authentication: required.

• Role: **`admin`** or **`employee`**.

• Headers: bearer token.

• Body: none.

• Success: **`200`** with the product and **`is_published:false`**.

• Errors: **`401`**, **`403`**, **`404 PRODUCT_NOT_FOUND`**, or **`422`**.

Demo enquiries

POST /api/v1/demo-enquiries

• Purpose: submit a demo enquiry.

• Authentication: not required.

• Role: none.

• Headers: **`Content-Type: application/json`**.

• Body:

```
{
  "name": "Jane Doe",
  "work_email": "jane.doe@company.com",
  "organisation_name": "Company Ltd",
  "product_id": "7c5dd1d1-2dc8-4bd6-a6c2-6c9eb1c5b6d2",
  "product_interest": "AzentioCore",
  "requirements": "We would like a full demo of the platform."
}
```

`product_id` is optional. **`name`** is 1-255 characters, **`organisation_name`** 1-255, **`product_interest`** 1-255, and **`requirements`** 10-5000 characters. Email is validated.

• Success: **`201`**

```
{"success":true,"message":"Enquiry submitted successfully","data":{"id":"0d2f4e2b-9d1f-4b54-8f5a-6e9d8d0a4a11"},"meta"
```

• Errors: **`422 VALIDATION_ERROR`**.

• Known limitation: the implementation does not verify that **`product_id`** exists and stores it without a foreign key in the Phase 2 migration.

GET /api/v1/demo-enquiries

• Purpose: list all enquiries.

• Authentication: required.

• Role: **`admin`**, **`employee`**, or **`moderator`**.

• Query: **`page`** minimum 1 (default 1), **`page_size`** 1-100 (default 20).

• Success: **`200`** with full enquiry records and pagination metadata.

• Errors: **`401 AUTHENTICATION_REQUIRED`**, **`403 FORBIDDEN`**, or **`422 VALIDATION_ERROR`**.

GET /api/v1/demo-enquiries/{enquiry_id}

• Purpose: retrieve an enquiry.

• Authentication: required.

• Role: **`admin`**, **`employee`**, or **`moderator`**.

• Success: **`200`** with **`id`**, user-supplied contact and organisation fields, **`product_id`**, requirements, status, timestamps.

• Errors: **`401`**, **`403`**, **`404 ENQUIRY_NOT_FOUND`**, or **`422`**.

PATCH /api/v1/demo-enquiries/{enquiry_id}/status

• Purpose: update enquiry status using the implemented transition rules.

• Authentication: required.

• Role: **`admin`**, **`employee`**, or **`moderator`**.

• Headers: bearer token and JSON content type.

• Body: **`{"status":"in_review"}`**

• Allowed values: **`new`**, **`in_review`**, **`responded`**, **`closed`**.

• Success: **`200`** with the full updated enquiry.

• Transition errors: **`400 INVALID_STATUS_TRANSITION`**.

• Other errors: **`401`**, **`403`**, **`404 ENQUIRY_NOT_FOUND`**, or **`422 VALIDATION_ERROR`**.

Database and migrations

• Migration: **`alembic/versions/72cef9ac2083_phase2_demo_enquiries.py`**

• Models: **`app/models/product.py`**, **`app/models/demo_enquiry.py`**

• Repositories: **`app/repositories/product_repository.py`**, **`app/repositories/demo_enquiry_repository.py`**

• Services: **`app/services/product_service.py`**, **`app/services/demo_enquiry_service.py`**

• Routers: **`app/api/v1/routers/products.py`**, **`app/api/v1/routers/demo_enquiries.py`**

• Schemas: **`app/schemas/products.py`**, **`app/schemas/demo_enquiries.py`**

Tests

• **`tests/test_products.py`**: public listing/detail, admin/employee mutations, unauthorized access, slug conflicts, unpublished visibility, persistence behavior at HTTP level.

• **`tests/test_demo_enquiries.py`**: public submission and validation, staff list/get/status, forbidden client access, status transitions.

• Baseline execution: 34 Phase 1/Phase 2 tests passed when this task began.
